

Aliaksandr Rasolka

Senior Backend Developer | Test Automation Lead

Email: rosolko@gmail.com

About Me

Hi, my name's Alex and I'm a senior backend developer. As well as developing I also have experience in test automation of api, web and mobile applications. I have worked at two companies gaining teamwork and leadership skills.

I am most skilled in: `Node.JS` and `Java`.

Projects

selenide

github.com/selenide/selenide

Selenide is a framework for writing easy-to-read and easy-to-maintain automated tests in Java. It defines concise fluent API, natural language assertions and does some magic for ajax-based applications to let you focus entirely on the business logic of your tests.

Proud that I could join the team, and team accepts me. Now I can contribute to the cool library.

wdm4j

github.com/rosolko/wdm4j

This small library aimed to automate the Selenium WebDriver binaries management inside a Java project.

Another small library I wrote as a way if learning **Java**.

WebDriverManager.Net

github.com/rosolko/WebDriverManager.Net

This small library aimed to automate the Selenium WebDriver binaries management inside a .Net project.

I started this project as a way if learning **.Net** and it has since grown into a fully fledged library. I have learned many skills through this and been I'm very proud of having this in my portfolio. If you don't have a project as awesome as this I would advise you make one.

Experience

tispr

tispr.com

Senior Backend Developer

September 2018 - Present

Participating in backend development. Using nodeJS and loopback.

Project about connecting, meeting and building communications, relationships and business. Display your Work. Showcase your business. Get discovered. Connect to clients. Find the right pros.
